| Sri Eshwar College of Engineering  | B.E EEE | CGPA:8.24 | 2024-2028 |
| Chellamal vidhyaashram CBSE school | HSC     | 81%       | 2022-2024 |
| Chellamal vidhyaashram CBSE school | SSLC    | 92.8%     | 2020-2022 |

## INTERNSHIP

|                                                                                                                                                                             |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Embedded Systems Intern   <b>Axiswin Technologies</b>                                                                                                                       | 2026 |
| Successfully completed a 10-day internship in Embedded Systems, gaining practical experience in microcontrollers, sensor interfacing, and embedded application development. |      |

## WORKSHOP

PCB Design and Fabrication Workshop|  
Successfully completed a 3-day hands-on workshop on PCB Design and Fabrication, gaining practical exposure to PCB layout design, fabrication, soldering, circuit assembly, and testing procedures.

## PROJECTS

|                                                                                                                                                                                                                                                                                                                           |      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>RAILWAY TRACK CRACK DETECTION &amp; HEALTH MONITORING SYSTEM</b>                                                                                                                                                                                                                                                       | 2026 |
| Built an IoT-based railway safety and monitoring system for real-time railway track crack detection and health analysis. Utilized embedded sensors and monitoring modules to identify track faults and abnormal conditions, improving railway safety and reducing accident risks through continuous automated monitoring. |      |

|                                                                                                                                                                                                                                                                                                                                                             |      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>IOT-BASED BIOMASS GASIFIER POWER SYSTEM</b>                                                                                                                                                                                                                                                                                                              | 2025 |
| Developed an IoT-enabled biomass gasifier power generation system using tea waste as a sustainable fuel source for rural electrification. Integrated real-time monitoring sensors with battery backup support to improve power reliability and energy management. Designed the system for eco-friendly electricity generation in remote and off-grid areas. |      |

|                                                                                                                                                                                                                                                                                                                                                                                          |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>IOT BASED FINGERPRINT SAFETY SYSTEM FOR WOMEN IN TRANSIT</b>                                                                                                                                                                                                                                                                                                                          | 2025 |
| Designed and developed an IoT-based women safety system for secure emergency assistance during transit. Integrated fingerprint authentication to prevent false alerts and enable authorized distress triggering. Implemented real-time GPS location tracking and emergency notification features for instant alert sharing during unsafe situations using embedded and IoT technologies. |      |

## CERTIFICATIONS

|                                                                             |      |
|-----------------------------------------------------------------------------|------|
| Certification for verilog HDL                                               | 2026 |
| Certification of completion in Mastering 8051 Assembly Language Programming | 2026 |
| C for Beginners   The Great Learning Academy                                | 2025 |
| Certificate of participation in Open AI Academy X NxtWave Buildathon        | 2025 |
| Certification of Participation in UI/UX Mega Workshop                       | 2024 |

## CODING PROFILES

**Skillrack-350+** Solved

## ACHIEVEMENTS

|                                                                                                              |      |
|--------------------------------------------------------------------------------------------------------------|------|
| National Finalist , AMD Slingshot 2026-Selected among top teams from 40,000+ participants across india       | 2026 |
| Secured Third Place in <b>Smart Energy Challenge</b> at Chennai Institute of Technology                      | 2026 |
| Mastering Data Structure and Algorithm using C and C++ Udemy                                                 | 2025 |
| Secured as a Grand Finalist in TNWise Hackathon 2025 at <b>Kalaigarkarunanidhi Institute of Technology</b> . | 2024 |
